

## **Central Laboratory Achieves 4th Cycle ISO/IEC 17025:2017 Re-Accreditation**

OPaL is delighted to announce that the Central Laboratory has successfully achieved its 4th cycle re-accreditation under the internationally recognized ISO/IEC 17025:2017 standard. This prestigious accreditation, effective from 26th August 2024 until 25th August 2026, was awarded following a comprehensive assessment conducted by Lead and Technical Experts on the 20th and 21st of July, 2024.

Covering an extensive 282 testing methods, this re-accreditation reflects our laboratory's continued commitment to maintaining the highest standards in testing and calibration. The evaluation, conducted in line with the National Accreditation Board for Testing and Calibration Laboratories (NABL) requirements, confirmed the laboratory's capability to deliver consistently accurate, reliable, and verifiable test results. OPaL's robust Technical and Quality Management System ensures that services meet global standards, reducing the need for retesting and boosting our international credibility.

Central Laboratory's ongoing efforts to update its testing methods demonstrate OPaL's dedication to staying ahead of emerging technological and regulatory trends. This achievement reinforces our commitment to providing our internal customers, partners, and stakeholders with the highest level of confidence in the precision and integrity of our results.

We extend our sincere appreciation to the entire Central Laboratory team for their dedication and hard work throughout the re-accreditation process, and we thank our partners and stakeholders for their continued support.

This milestone strengthens the laboratory's position as a leader in world-class testing and calibration services, and we are excited to continue contributing to industry advancements through innovation and excellence.
